Biz2Credit Small Business Earnings Report

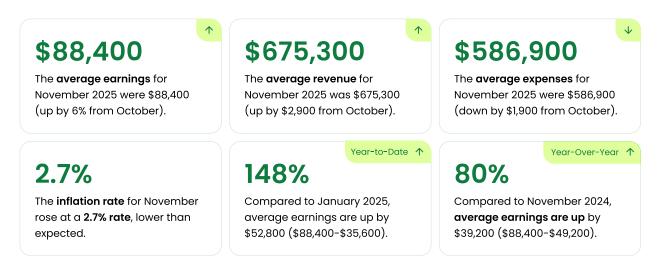

Small business tipped upwards in November, driven by the start of the holiday shopping season and a general cut in average operating expenses from October.

About the Report

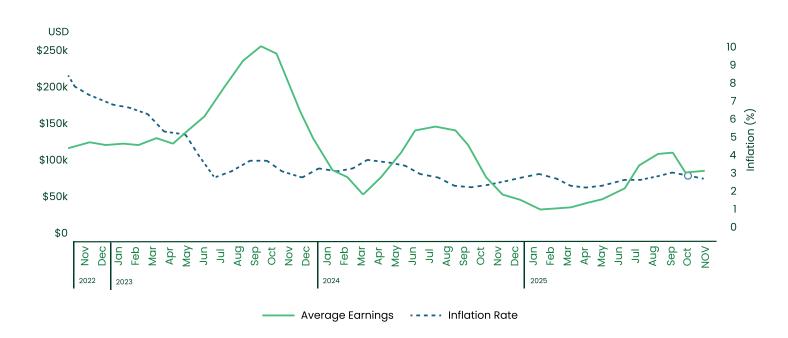

Biz2Credit's Small Business Earnings Index examines the financial situations of businesses

that used Biz2Credit to apply for business credit. The study looks at the performance of small to mid-sized firms -- from early stage to established companies -- in the U.S. that applied for credit in the past year. It's intended to provide a snapshot of the financial health of businesses nationwide across a wide range of industries.

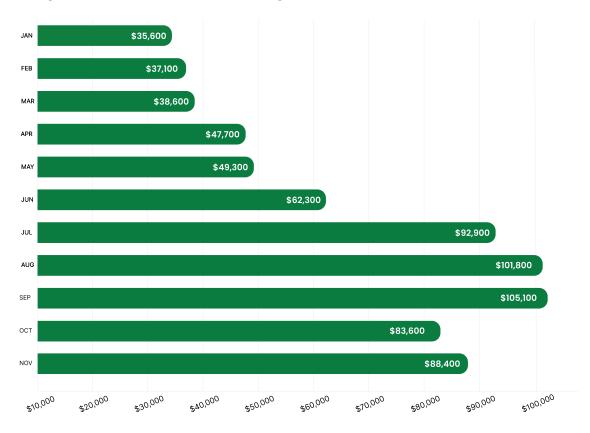

Key Findings

Small Business Earnings Report

Avg. Small Business Earnings 2025 (Year-to-date)

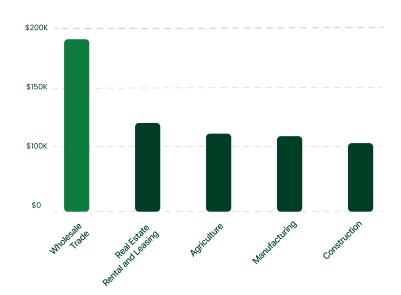

Top 5 Industries by Average Earnings

The average earnings in the information technology sector rose as the demand for technologies enabling AI, cloud computing and the "Internet of Things" continue to skyrocket.

Meanwhile, the wholesale trade sector continues to be propelled by continuing consumer preferences to purchase goods through e-commerce.

Takeaways

Any way you slice it, the health of many small businesses in the U.S. hinges upon how much consumers are willing to shell out during the holiday season. Meanwhile, ongoing economic uncertainty will follow small businesses into the new year. Anxiety still looms regarding inflation and the ever-changing tariff policies of the U.S. Economists are also awaiting a decision by the U.S. Supreme Court on whether many of the Trump Administration's tariffs are legal. They are also hopeful that the Federal Reserve board will continue cutting the overnight rate after pausing last month due to the government shutdown. 2026 should be interesting.
